Important Changes to Operation and System

Configuration with November 2011 Upgrade

DENON

AVC-A1HD / AVC-A1HDA

AVP-A1HD / AVP-A1HDA

Upgrade

Important notice about changes to units after the upgrade has been performed.

- 1) All System Configuration settings stored in the unit will be cleared by this upgrade.

For example, all settings listed below will be deleted.

- ① Information related to Auto setup (including Audyssey Pro)
- ② Installer setup data
- ③ Personal Memory Plus
- ④ Network connection settings
- ⑤ Quick Setup information

Since all above settings will be deleted, customers will need to reconfigure the unit upon completion of the upgrade: For Audyssey Pro Calibration, your Custom Integrator will need to be called for recalibration.

- 2) A new Setup Microphone (DM-A409) is included with this upgrade.
As part of the upgrade, a new Audyssey calibration microphone is included; Please use this microphone to perform the Audyssey calibration after the unit has been upgraded.
- 3) Instruction manual is provided by CD-ROM with an interactive function.
- 4) No warranty is implied or extended with this upgrade.
- 5) Once the upgrade has been performed, end user will have to perform the System Setup as if the unit were brand new. All user settings will be deleted upon completion of the upgrade.
- 6) All prior factory firmware updates are included in this upgrade.
 - ① DENON LINK 4th
 - ② Audyssey Dynamic Volume.

Features and System functionalities that will be removed and/or changed by this upgrade:

- 1) Night Mode: removed
- 2) Neural dts: removed
- 3) Surround Speaker B: removed: Output terminals will now function as Front Height or Front Wide depending on setup after upgrade.
- 4) dts Neo:6/NeoX DECODER doesn't work with DSD signal. (*1)
- 5) Do not use the original Setup microphone supplied, Please use only the new upgrade supplied microphone when setting up the unit after the upgrade.
- 6) Incompatible with NeoX + THX (*1)
- 7) Incompatible with Dolby HP + NEO:X/Neo:6 (*1)
- 8) Remove Dolby Lineout Mode under the Down mix option.
- 9) Remove Non-Matrix feature at the Surround Parameter setting of the Surround Back.
- 10) Removed Surround Back 'OFF' function in cases of input signal that includes Surround Back signal.
- 11) Can't Select DOLBY PL II while speaker config setting is only "Front L/R".
- 12) Can't Select THX = ON while speaker config setting is only "Front L/R" or Headphone playback.

(*1 : Functions deleted by upgrade from dts Neo6 to dts NeoX)

Other information

- 1) Changing Function name of Terminals and Buttons by this upgrade are given with labeling.
- 2) Changing Licensers' Logos on Front panel are given with labeling.
